

QUICK START GF-BACKPACK

PREPARING SPRAY

1. Operator must wear approved Personal Protective Equipment based on chemical manufacture requirements.
2. Visit [cdc.gov](https://www.cdc.gov) and read information labels about chemical usage and their hazards.
3. Clear the area for general public before disinfecting or sanitizing. Place signs or warning indicators to ensure no one should enter the area.
4. Ensure power button is switched to "OFF".
5. Ensure battery has sufficient charge.

EQUIPMENT SETUP

1. Twist open bladder bag cap and apply desired chemical cleaning with appropriate water ratio.
2. Close bladder bag cap tightly.
3. Place bladder bag inside the top zipper of the GF-Backpack.
4. Ensure the hose, applicator gun, external and internal components are properly secure.

OPERATIONAL PROCEDURES

1. Push the switch button "ON"
2. Direct the spray gun nozzle at the desired surface. Press the four finger trigger to initiate spraying.
3. Hold the trigger to allow the chemical liquid to pass through the hoses and applicator gun.
4. When spray successfully flows through the tip, follow a continuous path around the working area from high to low areas in a sweeping motion until all surfaces are covered.
5. Stop spraying the GF-Backpack by releasing the four finger trigger.
6. After spraying, keep the area closed to the public based on CDC chemical dwell time requirements.
7. Remove all warnings and signs after the sanitized time requirement is complete.
8. When complete, push the switch button "OFF".
9. Quick disconnect your spray nozzle tip and thoroughly clean all internal and external surfaces before next usage.
10. Store in a safe, dry place. Do not expose to or store in extreme heat or freezing temperatures.
